

JMG specialises in Pharmaceutical and Healthcare project delivery, with a focus on mechanical engineering solutions. We are a principal contractor specialising in M&E biased projects, seeking a Health & Safety Manager ideally with experience in Construction, pharmaceutical, healthcare and industrial sectors.

The main purpose of this role is to provide Health & Safety Management across all projects to support the various project teams, ensuring the effective delivery of the organisation's Health & Safety responsibilities.

Some of your key responsibilities will include:

- You will collaborate with employees, oversee the H&S operations within the company, communicate with management and take part in planning the needs of the company including administrative tasks in relation to Health & Safety procedures to ensure the Company is compliant with the Health and Safety at Work Act 1974.
- Create, promote, and maintain a positive Health & Safety culture across all business functions
- Provide guidance and advice to all colleagues
- Booking and liaising with training providers to ensure all employees have the necessary qualifications to be competent in their roles and managing the Company training matrix.
- Support the Business with delivering strategies and policies on Health & Safety
- You will work closely with the Health and Safety teams of Clients and Suppliers to manage the company's Health & Safety Management system and report to senior members of the Company in weekly team meetings.
- Identify areas for continuous improvement.
- Effective communication of Health & Safety matters across all areas
- investigating any Near misses /accidents on sites and producing subsequent reports and recommendations; and carrying out site inspections to check policies and procedures are being properly implemented.

Completion of weekly H&S audits on various projects, producing action plans and highlighting any perceived risks.
